

Municipality of Roosendaal chooses Unit4 ERPx to modernize financial processes

Unit4, a leader in cloud enterprise software for service-centric organizations, has announced that the Municipality of Roosendaal has chosen Unit4 ERPx as its new financial system. With this step, the municipality is focusing on further digitizing and simplifying its financial processes. The collaboration highlights the trust municipalities place in Unit4 ERPx as a future-proof SaaS solution for the Public Sector.

The Municipality of Roosendaal is a mid-sized Dutch local authority dedicated to delivering accessible and efficient public services. Digital transformation, financial control, and future-ready operations sit at the heart of that mission. Driven by this ambition, the municipality sought a modern financial system to support its ongoing development.

Future-proof financial environment

The municipality was looking for a financial management system where flexibility, low administrative overhead, and a future-ready SaaS solution were key criteria. With Unit4 ERPx, the Municipality of Roosendaal chose a cloud-native solution that supports standardized processes, delivers real-time visibility into financial data, and better aligns with compliance and governance requirements. The implementation forms part of a broader digital modernization across the organization.

Short- and long-term improvement

Following a thorough and extensive market evaluation, the municipality chose Unit4, driven by its close fit with local government processes, lower administrative complexity, and extensive experience in the Public Sector. With Unit4 ERPx, the municipality expects to gain greater control over financial processes in the short term and generate better reporting. Over the longer term, the platform will serve as the foundation for further digitization and continuous organizational improvement.

> **"By choosing Unit4 ERPx, we're taking the right step toward an improved, future-ready financial environment. We need the right solution to help us standardize processes and gain better insight into our financial management."**

> Ronald Ehlen
>
> Director of Operations and Service Delivery at the Municipality of Roosendaal

Ronald Ehlen, Director of Operations and Services at the Municipality of Roosendaal: "By choosing Unit4 ERPx, we are taking an important step toward an improved and future-proof financial environment. We need a solution that helps us standardize processes and gain better insight into our financial steering. We found that in ERPx. It is also great that this transition helps us reduce the complexity of our IT landscape."

Wilfried Teunissen, Director Sales Continental Europe - Public Sector: "It's great to see another Dutch municipality choose our solution. The Municipality of Roosendaal's decision shows that municipalities increasingly need and choose the right modern, cloud-based approach to their financial processes. With ERPx, we support them in this and give them greater control over their financial processes."
