CMSCamp Mallorca 27. Sep – 29. Sep 2024

# CMSCamp Mallorca

CMSCamp Mallorca is the first international barcamp on the topic of CMS and all related areas resulting in a digital experience platform. It brings together agencies, customers and vendors of software products for the web in a unique atmosphere. It doesn't matter whether we are talking about a large DXP platform, headless CMS or an open source product in a composable architecture, as long as the focus is on a greater web experience.

The CMSCamp is not a promotional event, but brings practitioners together at eye level. Whether developer or project manager, marketing manager or creative head, product director or agency owner, the common goal is the mutual exchange of knowledge and experience.

## CMSCamp Mallorca is organised by

The camp is being organised by a team of experienced CMS experts on both the product and agency side, who have worked with a dozen or so systems and who believe that it is more beneficial to share ideas with each other than to work against each other.

The open format of the camp in the motivational atmosphere of Mallorca is the perfect place for that.
