

# The Hague University of Applied Sciences modernizes operations with go-live of Unit4 ERPx

**Unit4, a leader in cloud enterprise software for people-centric organizations, announces that The Hague University of Applied Sciences (De Haagse Hogeschool) has successfully deployed Unit4 ERPx as its new enterprise resource planning (ERP) system. Following a European tender procedure, the educational institution selected Unit4's cloud solution to modernize its financial and administrative processes. Axians managed the full implementation of the new platform, which has been live since January 1, 2026.**

## Foundation for further digitalization

With around 25,000 students and more than 2,000 employees, The Hague University of Applied Sciences is one of the largest universities of applied sciences in the Netherlands. The implementation of Unit4 ERPx is part of the institution's broader digital transformation. Through this integration, The Hague University of Applied Sciences aims to replace outdated, fragmented systems with a single ERP platform that brings processes together, provides real-time insights into financial and operational data, and reduces the administrative burden.

## Integrated business operations support

The new ERP system replaces several existing applications. Through this change, The Hague University of Applied Sciences aims to improve information management and better support the organization as it continues to digitalize operations.

> **"By choosing Unit4 ERPx, we are taking an important step in the further digitization of our organization."**

Mignon de Ruiter, Director of Business Operations and Control at The Hague University of Applied Sciences: "By choosing Unit4 ERPx, we are taking an important step in further digitizing our organization. The platform provides the right solid foundation to further improve our information provision, gain better data insights, and future-proof our operations. This enables us to provide even better support to our employees and students."

Dirk Bok, Business Unit Director at Axians: "In collaboration with the employees of The Hague University of Applied Sciences, we've delivered a fantastic project. This go-live marks an important milestone in the digital transformation of The Hague University of Applied Sciences. With Unit4 ERPx, the organization now has the right, powerful, and future-proof platform to bring flexibility, smarter processes, and a next-generation user experience to its administrative and financial operations."

Wilfried Teunissen, Sales Director Continental Europe - Public Sector: "It's vital that educational institutions are supported by modern systems, so they can focus on their core mission: delivering quality education. With Unit4 ERPx, The Hague University of Applied Sciences has an integrated ERP platform that supports daily operations and prepares the organization for future developments. We're proud to have played a part in this."
